

BGH

Trigger Poti Switch (Lithium Brushless Motor System)

High rated switch for applications rated up to 45A 62Vdc. Integrated with potentiometer, additional NO/NC signal function and forward/reverse signal, main applications include switch on and control cordless brushless tools with remote electronics.

Different types of bottom housing are available for easy adaptation to different trigger cap design.

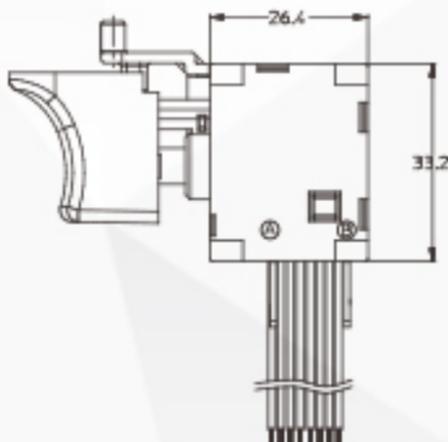

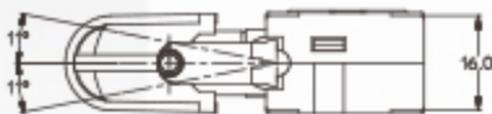

-Features

- Signal to indicate reverse position
- Pre-wired to specifications

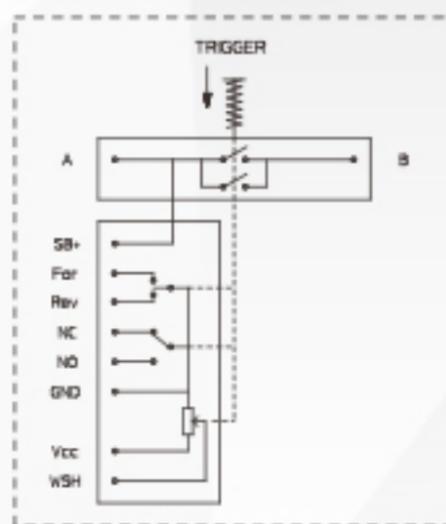

-Options

- Potentiometer
- Wire
- Diode
- Output signal
- NO and NC signal

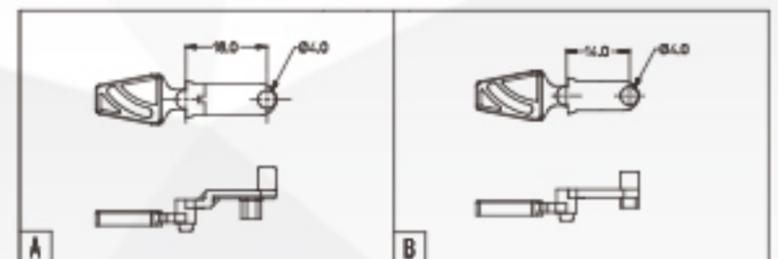

Models	Configuration	Approvals		
BGH	SPST Poti switch	35A, 12~62Vdc, 5E4	35A, 12~62Vdc, 5E4	20.1A Max, 42Vdc Max, 5E4
BGH	Signal switch	20mA, 3.3~62Vdc, 5E4	20mA, 3.3~62Vdc, 5E4	-
