

CGK-mini

Large Angle Grinder Switch

Compact version of CGK high rated switch for heavy duty applications and rough environment. Suitable for tools with limited space where the standard CGK cannot be used, for example 2kg, 5kg and demolition hammers. Featuring a patented double snap action system to maintain high contact pressure to prevent contact teasing or chattering. Available in several sizes, wiring options and trigger configurations, including a bistability version.

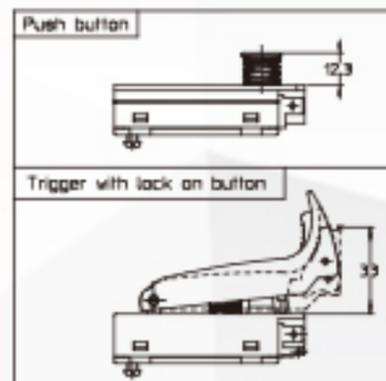

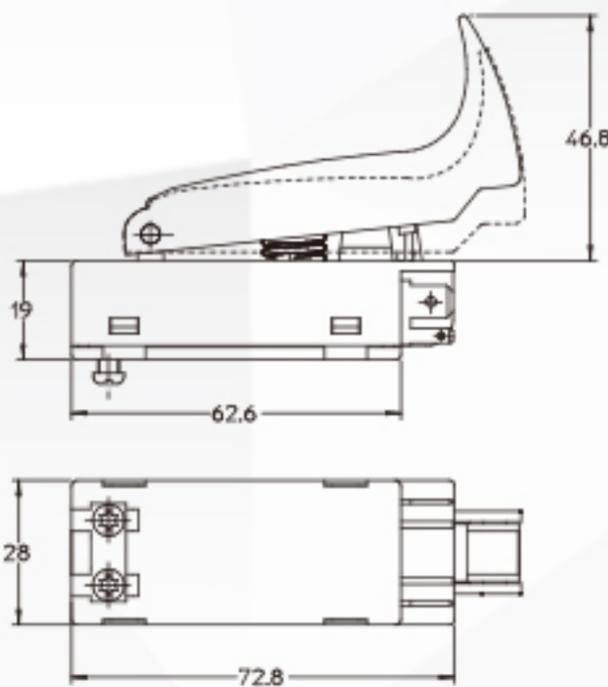

-Features

- Patented double snap action contacts for long and trouble free operation
- High rating up to 12(12)A 250Vac
- Dust protected

-Options

- Lock on, safety lock or no lock button
- Optional suppression capacitor
- Customized trigger options
