

CGN

Trigger Switch On-Off Euro Style

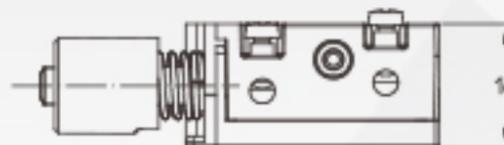

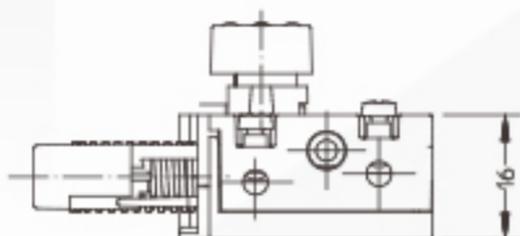

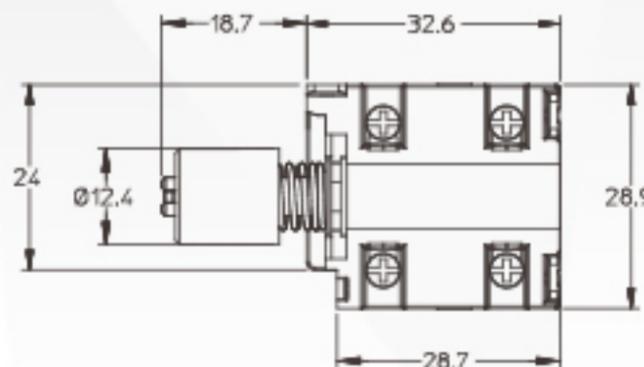

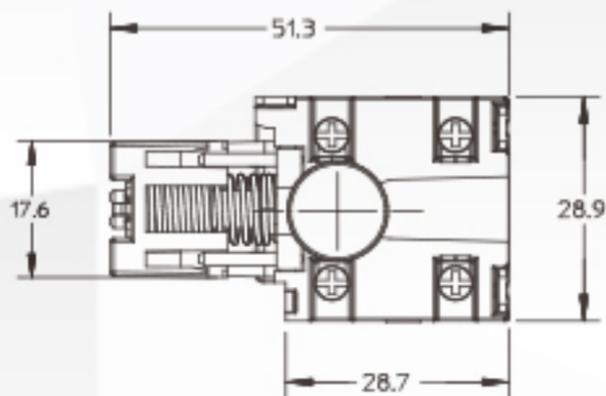

Euro style in-line trigger switch featuring a patented spring system that prevents arcing and fast contact wear. Contact pressure at both opening and closing is held to its maximum force until switching, making CGN particularly suitable for high current AC applications on hazardous tools like saws.

-Features

- Unique contact system: insensitive to teasing and arcing
- Mechanical and electrical robustness
- Screw terminals
- Compatible with industry standard
- Dust protected
