

CGP

Trigger Poti Switch (Brush Motor System)

Heavy-duty, dust protected, high rated, in-line trigger switch with voltage up to 42Vdc and continuous currents as high as 45A.

Integrated with potentiometer, main applications including switch on and control cordless tools with remote electronics. Numerous options including brake, reversing switch, diode wiring and battery terminals are available.

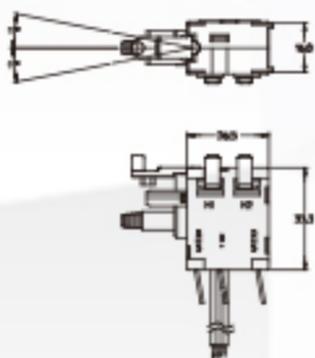

-Features

- High power applications up to 45A 42Vdc
- Integrated F/R signal control
- Dust protected

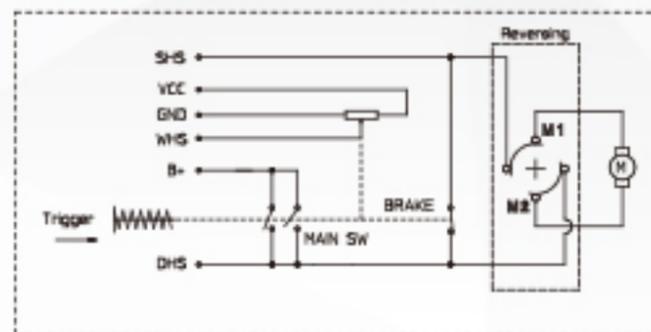

-Options

- Brake
- Stepless or multi-step potentiometer
- Solder or pre-wired input/output
- Diode
- Customized trigger and reversing lever
