

EGD-3115 BLDC

Trigger Switch (Brushless Motor System)

Ultra compact switch for switch on and control of cordless brushless tools with remote electronics, applications up to 30A 24Vdc. Easily fit in slim grip, allowing compact and ergonomic end-product design.

Equipped with excellent dust proof and robustness features, potentiometer and forward/ reverse signal indication.

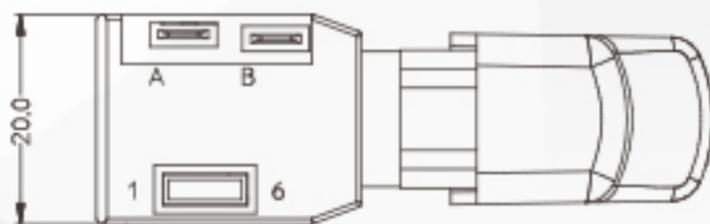

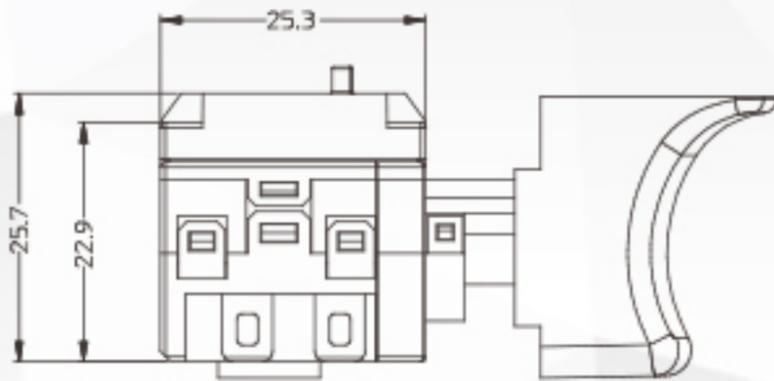

-Features

- Ultra compact size
- Integrated F/R signal control
- High power contact
- Stepless or multi-step potentiometer
- Pin connected for signal output
- Dust protected

-Options

- Various wire and potentiometer options
- Signal version
- Customized trigger
