## Trigger Poti Switch For BLDC With Main On

**IP67**

Ultra compact high rated switch for brushless applications with external PCBA, applications up to 30A 62Vdc.

Integrated with potentiometer, additional NO/NC signal function and forward/reverse signal, main applications include switch on and control cordless brushless tools with remote electronics.

Advanced dust & waterproof protection up to IP67.

### -Features

- Ultra compact size
- High power application up to 30A 62Vdc
- Integrated F/R signal control
- Pre-wired for signal output
- IP67

### -Options

- Stepless or multi-step potentiometer
- Diode
- NO and NC signal
- Soldered or pre-wired power cord
- Customized trigger
