

EPX

Push Button Switch

Highly reliability and durable, suitable for small angle grinders (SAG) and other dusty environment, high current draw applications. Featuring patented non-teasible mechanism that enhance endurance and prevent teasing tackled.

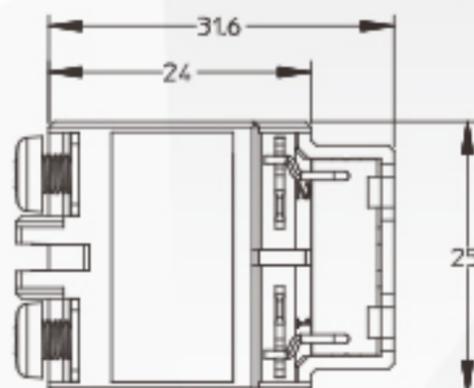

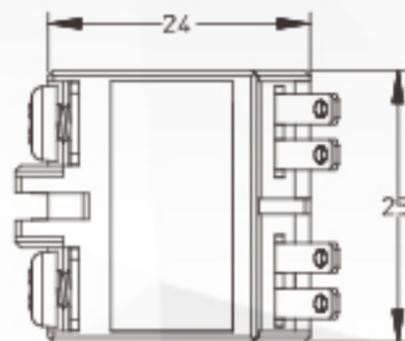

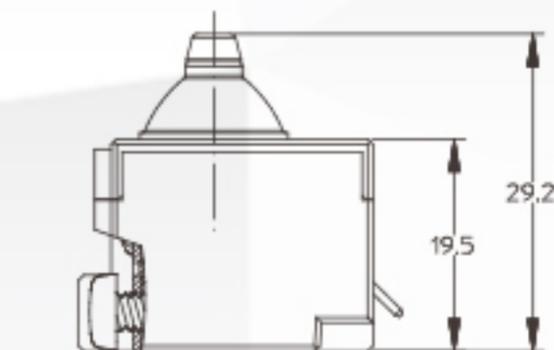

-Features

- Momentary-ON
- Internal fail-safe contact mechanism for added reliability and durability
- Weld safe
- Bistability
- Full dust protection on actuator to prevent sticking

-Options

- Single or double pole
- Integrated holder for common size capacitors
